SUMMARY

Full Stack Developer with 3+ YOE architecting high-throughput enterprise web applications, resilient microservices, and AI-assisted workflows. Specialized in React.js, TypeScript, Redux Toolkit, Node.js, Express.js, MongoDB, SQL, Docker, OpenAI API, RAG architecture, and Vector Search.

CORE COMPETENCIES & TECHNICAL MATRIX

- Frontend: React.js, TypeScript, JavaScript (ES6+), Redux Toolkit, Material UI, Tailwind CSS, SCSS, HTML5, CSS3, WCAG 2.1 Accessibility, Code Splitting, Jest/RTL
- Backend: Node.js, Express.js, REST APIs, MongoDB, SQL Databases, JWT, RBAC, Docker, Microservices Architecture, CI/CD Pipelines
- AI Systems: OpenAI API, RAG Architecture, MongoDB Vector Search, Prompt Engineering

PROFESSIONAL EXPERIENCE

- Synechron Technologies Pvt. Ltd â Senior Associate Technology (Full Stack Developer)
Aug 2022 - Sep 2025 | Pune, India (Client: U.S. Bank - BFSI Compliance Domain)
- Architected enterprise React.js and Node.js applications supporting 500+ daily financial compliance analysts with sub-200ms API response rates.
 - Engineered reusable TypeScript + MUI component design system, reducing frontend development overhead by 25%.
 - Optimized web application bundle size and component rendering tree, cutting initial page load speed from 4.0s to 2.0s (50% speedup).
 - Integrated OpenAI API with prompt-engineered GPT completions for automated transaction risk summaries, reducing analyst write-up time by 35%.
 - Built Node.js RAG pipeline with MongoDB Atlas Vector Search HNSW indexing, improving semantic policy retrieval speed by 40%.
 - Containerized backend microservices with Docker and maintained CI/CD pipelines.

KEY PROJECTS

1. U.S. Bank - KYT (Know Your Transaction) Compliance Platform
Stack: React.js, TypeScript, Node.js, OpenAI API, MongoDB Vector Search, Jest/RTL
 - Real-time transaction monitoring platform serving 500+ compliance analysts.
 - Designed GPT prompt templates returning structured JSON with zero post-processing.
 - Wrote unit and component tests with Jest and React Testing Library.
2. Governance Dashboard Platform
Stack: React.js, JavaScript, Redux, Node.js, Tailwind CSS, REST API, Jest, CI/CD
 - Internal governance dashboard providing consolidated reporting metrics.
 - Wired up Redux/Context API state management and integrated REST APIs with Postman.
 - Contributed to GitHub/GitLab CI pipelines for automated build and test gates.

EDUCATION & CERTIFICATIONS

- B.Sc. in Information Technology (BSc-IT) | Dr. Babasaheb Ambedkar Marathwada University (2018 - 2021)
- Star Award - Performance Excellence | Synechron Technologies (2023)
- Star Award - Technical Innovation | Synechron Technologies (2024)
